

Fully operational modes for Vx Acquisition™, Vx Capture™ and Vx Extract™, require a USB licensing key.

Without the USB key, software runs in “demo” mode. Demo mode limitations:

- Vx Acquisition → Run times limited to 10 minutes.
- Vx Capture → Data access limited to 10 minutes, or, at most 5/8th of scans.
- Vx Extract → Data access limited to 10 minutes, or, at most 5/8th of scans.

In “evaluation” and “registered” modes, Vx Acquisition, Vx Capture and Vx Extract are fully functional.

Evaluation mode has an expiration date. Once the key expires, the above programs revert to “demo” mode, even with the key installed.
